Sec. 50-143. Building sewers and connections.

(a) No unauthorized person shall uncover, make any connections with or opening into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the administrator or his appointed agent.

(i) (1) No person shall make connection of roof downspouts, foundation drains, areaway drains, floor drains, basement drains, or other sources of surface runoff or groundwater to a building sewer or building drain that in turn is connected directly or indirectly to a public sanitary sewer. Building sewers, drains and appurtenances thereto shall be properly sealed off or otherwise protected from groundwater or stormwater infiltration where a building is demolished, or otherwise put in such a condition that groundwater or stormwater infiltration becomes likely.

(k) The applicant for the building sewer permit shall notify the administrator when the building sewer is ready for inspection and connection to the public sewer. The connection and testing shall be made under the supervision of the administrator or his representative.

(l) All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the council.

(Code 1980, § 5-2-3; Code 1997, § 50-143)

Sec. 50-144. Use of certain water-saving devices required.

(a) Any person installing new flush toilets for any reason, after the effective date of the ordinance from which this article was derived, shall install flush toilets that use no more than four gallons of water per toilet per flush.

(b) Any person installing or replacing shower heads for any reason, after the effective date of the ordinance from which this division was derived, shall install a shower flow control device that shall allow no more than four gallons per minute to pass through the shower head.

(c) Any person installing or replacing lavatory spigots for any reason, after the effective date of the ordinance from which this division was derived, shall install flow control devices in each spigot that shall allow no more than four gallons per minute per spigot.

(d) Urinals shall be placed in all men's restroom facilities in all commercial or industrial or other establishments constructed after the effective date of the ordinance from which this division was derived where public restroom facilities are provided. Such urinals shall use less than two gallons per flush.

(e) A restroom shall be deemed open to the public if:

(1) A substantial portion of the general public has access, even if use is restricted to paying customers;

(2) If permission to use must be granted by the owner; or

(3) If the facility is normally locked.

Any restroom not in a private home, where persons other than employees have access in any substantial, regular or semi-regular basis, shall be deemed public for the purposes of this division.

(Code 1980, § 5-2-4; Code 1997, § 50-144)

Sec. 50-145. Prohibited discharges.

(a) No person shall discharge or cause to be discharged any stormwater, groundwater, roof runoff, subsurface drainage, downspouts, yard drains, yard fountain and ponds or lawn sprays into any sanitary sewer. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers or to a natural outlet approved by the council.

(Code 1980, § 5-2-5; Code 1997, § 50-145)
